

SRINIBASH SAMAL

♥ Hyderabad, Telangana ☎ +91 7853023185 ✉ samalsrinibash@outlook.com 🌐 srinibashsamal

Profile Summary

Software engineer with over 3 years in data analytics, specializing in designing and developing data-driven applications. Proficient in Python, Azure, SQL, and Gen AI, with expertise in data analysis, system design, prompt engineering, database management, and system integration. Adept at turning complex business requirements into scalable technical solutions, collaborating with stakeholders and cross-functional teams, and driving impactful results through data-informed decisions.

Experience

IQVIA

Data Analyst

July 2025 – Present

Bengaluru, Karnataka

- Lead Python programming for clinical studies and departmental projects, enhancing automation and data processing.
- Managed end-to-end data transmission lifecycle, ensuring quality, compliance, and timely delivery to external clients.
- Collaborated with cross-functional teams to resolve data issues, align timelines, and maintain service excellence.
- Mentored junior staffs and professionals in Python, fostering technical growth and best practices in data management.
- Core team member driving migration of legacy SAS processes to Python, streamlining workflows and improving scalability.

Acuvate Software

Software Engineer

May 2022 – May 2025

Hyderabad, Telangana

- Delivered scalable, production-grade solutions involving Azure, OpenAI, SQL, and Python.
- Collaborated closely with clients to gather requirements and convert them into end-to-end technical solutions.
- Maintained clean, well-documented code with focus on modularity, testing, and maintainability.
- Ensured projects met deadlines and standards with proper documentation, testing, and ongoing client support.

Technical Skills

Languages: Python, C, Java, HTML, CSS, JavaScript

Developer Tools: VS Code, Jupyter Notebook, Power BI (Basic), Azure, GPT, Git

Database: Microsoft SQL Server, PostgreSQL

Interpersonal Skills: Requirement Gathering, Problem Solving, Project Management

Projects

Real-Time Intelligence on Microsoft Fabric | *Python, Microsoft Fabric, Azure, KQL*

March 2025 - Present

- Collaborated with stakeholders to gather requirements and define business logic.
- Developed a Publisher-Subscriber system simulating wind turbine sensor data using a custom-built OPC UA Server (Publisher) and an asynchronous OPC UA Client (Subscriber).
- Streamed real-time data via Azure Event Hub, integrated with Microsoft Fabric's Eventstream for real-time ingestion and storage.
- Designed and configured Eventhouse (KQL database) and built custom KQL queries for live data analysis and transformation.
- Created an interactive real-time dashboard in Microsoft Fabric to visualize incoming turbine metrics.
- Implemented threshold-based alerts using Fabric's Activator for proactive critical sensor monitoring and notifications.

Kelley Drye - Budget Automation | *Python, Prompts, Azure, OpenAI, SQL*

November 2023 - Feb 2025

- Collaborated with stakeholders to understand business logic and gather requirements for the solution.
- Developed an AI-driven solution using Azure Function Apps and Azure OpenAI to enhance data retrieval capabilities and extract key information from incoming emails for budget preparation.
- Developed multiple APIs for seamless interaction with the database (CRUD Operations) and front-end to retrieve necessary information from the database for budget calculations.

- Created automated email drafting features to request missing information and confirm budget completion using different kinds of prompts.
- Automated data collection post-budget calculation and generated two customised Excel files based on templates for further processing and reporting.

Carnival Corp IT ChatBot | *Python, Prompt Engineering*

September 2024 - October 2024

- Designed a chatbot to assist Carnival Corp employees with their queries and concerns regarding company policies, enhancing internal communication.
- Collaborated with the client to create a multilingual solution, enabling the chatbot to respond in five different languages, ensuring accessibility for a diverse workforce.
- Developed an Intent Detector using Azure OpenAI to accurately interpret the meaning and intent behind user queries, improving the chatbot's contextual understanding.
- Achieved over 90% accuracy in query responses, delivering a highly reliable and efficient tool for employees to get timely and accurate information.

Blakes – Bot Upgradation | *Python, Prompt Engineering, SQL*

June 2024 - August 2024

- Upgraded the existing OpenAI integration from GPT-3.5 to GPT-4o for improved performance and capabilities.
- Designed and implemented new features to enhance bot intelligence and user interaction.
- Integrated the upgraded model into a RAG (Retrieval-Augmented Generation) architecture to support context-aware, data-driven responses.

Internal-Practice (GPT Data Bot) | *Python, SQL, Python, Gradio, Prompt Engineering* **March 2023 - October 2023**

- Developed backend infrastructure to connect the system with the database.
- Engineered prompt-based functionality to generate SQL queries from user input using Azure OpenAI.
- Executed the generated SQL queries to retrieve data and provided visualizations with Vega-Lite code.
- Created dynamic charts and graphs based on user-defined data inputs.

Software Engineer Trainee

May 2022 - February 2023

- Joined as a Software Engineer Trainee through College campus placement, gaining hands-on experience in various technologies.
- Received extensive training on Python, PostgreSQL, SQL Server, Power BI, HTML, CSS, and JavaScript, building a strong foundation in software development.
- Worked on multiple internal projects, collaborating with senior developers and support staff to troubleshoot, debug, and optimize code for better performance.
- Developed small web-based applications and reports using HTML, CSS and JavaScript to support operational tasks and enhance data visualization.
- Contributed to database management tasks, including writing SQL queries and performing basic optimizations in SQL Server and PostgreSQL.
- Assisted senior developers in project tasks, including testing, and documentation, gaining exposure to full project lifecycles.
- Collaborated with cross-functional teams, attending meetings to discuss project requirements, improving communication and teamwork skills.

Education

GITA Autonomous College

Master of Computer Applications

July 2020 – Sept 2022

Bhubaneswar, Odisha

Utkal University

Bachelor of Science, Physics

June 2017 – Sept 2020

Bhubaneswar, Odisha

Certifications

Google Cloud Certified Associate Cloud Engineer

Google

Online

CS50P

Harvard University

Online

Crash Course on Python

Google

Online

Python for Data Science, AI & Development

IBM

Online
